Technical Services
Standard Rates

Scientific Research Corporation's engineering staff can provide rapid and cost-effective solutions in small focused consulting efforts or through full system development, implementation, and life-cycle support in a wide range of state-of-the-art technologies including:

- Sensor Systems
- Wireless Communications
- Test Instrumentation
- Test & Evaluation
- Modeling & Simulation
- Digital Signal Processing
- Air Traffic Control
- Information Technology
- Wireless & Wireline Networks
- Intelligence & Cryptologic Systems

SRC can also provide formal training courses, logistics supports, installation, and maintenance services. This range of service enables you to choose the support that best meets your needs.
